# DESI KAMDRAWATI

**EVENTS & COMMUNITY GROWTH | EARLY-STAGE TECH, WEB3 & AI**

I design why people gather, then produce the events and community-led growth that make early-stage teams stick. At Derive.xyz I produced the company's first live event, helped grow Discord from 15K to 40K+ through a token launch, and co-ran an ecosystem campaign for Ethereum's tenth anniversary. Interior design taught me how environments shape behaviour, and I've spent a decade applying that from youth camps to onchain communities. Now: bringing that instinct to events and community in web3 and AI.
